

Career Opportunity

Job Title: Avionics Technician

Department: Aircraft Maintenance

Basic Job Description:

The position entails a solid foundation of avionics system installation on both turbo prop and jet aircraft.

Essential Job Duties:

- Installation of aircraft avionics systems, including electrical, entertainment, and instruments on both jet and turbo prop aircraft.
- Diagnostically troubleshoot aircraft defects and carry out corrective action
- Complete records of work done and sustain an accurate record system
- Ability to interpret blueprints and written technical instructions
- Work in confined spaces and elevated heights when required
- Willing to put in additional time on weekends and evenings to complete tasks
- Work independently when required

Job Responsibilities:

- Must perform work in accordance with all Transport Canada and Federal Aviation Administration guidelines.
- Maintain professional work habits at all times
- Be able to work and communicate with employees and customers in a professional manner.
- Be able to follow all company and health and safety policies and procedures.

Job Requirements:

Education: High School Diploma or equivalent
Completion of College or technical training AutoCAD.

Experience: 1-3 years of aircraft system installations in jet and turbo prop aircraft.
